

XM Instant Traffic & Weather is a wonderful, valuable and priceless service. I travel extensively for business and am able to simply, easily and quickly access information to navigate through large cities up and down the east coast. NAB's petition is ludicrous and anti-business. Necessity is the mother of invention and XM's ability to provide a tremendous and unique service should be expanded and built upon, not stifled by local radio stations who want to squash the competition rather than compete with them.

Sincerely,

Brad Carman
